

Target 100 Environmental

The UK's Leading Online Environmental Management System

The Developed by market leader Business Safety Systems, Target 100 Environmental is a state-of-the-art online Environmental Management System (EMS) that can be used by organisations of any size to demonstrate sound environmental performance by assessing and controlling the impacts of their activities, products and services on the environment.

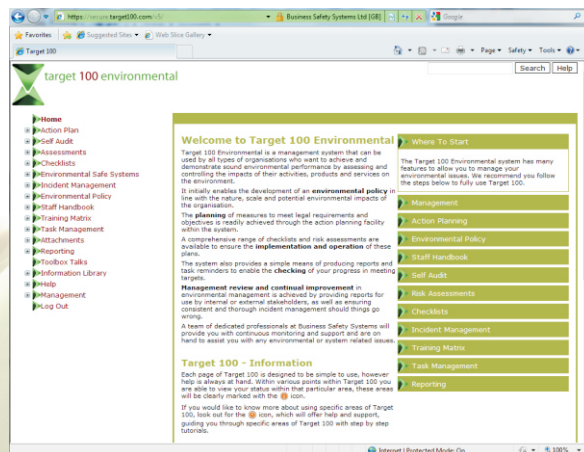

From the development of initial environmental guidelines to full [ISO 14001 compliance](#), Target 100 Environmental offers a comprehensive suite of tools to allow your organisation to implement an environmental policy in line with the nature, scale and potential environmental impact of your operations:

- The planning of measures to meet legal requirements is achieved through the system's unique [Action Planning](#) facility.
- A comprehensive range of [Checklists](#) and [Risk Assessments](#) are available to ensure the implementation and operation of these plans.
- The system provides [Management Reports](#) and [Task Reminders](#) to enable you to check progress and remain on schedule.
- [Self Audits](#) allow you to assess how your organisation is performing and remain on target of full ISO 14001 compliance.

Target 100's modern, design combines sophisticated online functionality and unparalleled ease of use, without the purchase and support costs associated with traditional software systems. This "software as a service" approach places an effective environmental policy within the reach of even the smallest organisation.

Achieving Accreditation

Published in November 2004, EN ISO 14001:2004 (also adopted in the UK by the British Standards Institute as BS EN ISO 14001:2004 Environmental Management Systems) is the international standard designed to help organisations of all sizes implement an Environmental Management System (EMS) from scratch, or improve their existing systems and processes.

ISO 14001 compliance is becoming the preferred choice for many UK organisations looking to minimise the environmental risks associated with their operation, ensure proper corporate governance and generally demonstrate their environmental credentials.

One of the most popular and cost-effective methods of achieving 14001 accreditation is via the implementation of an Environmental Management System (EMS).

Target 100 Environmental is an online Environmental Management System (EMS) suitable for organisations of all sizes who want to achieve ISO 14001 compliance and ensure sound environmental performance by assessing and controlling the impacts of their activities, products and services on the environment.

Target 100 Environmental enables organisations to develop an environmental policy in line with the nature, scale and potential impact of their operation on the environment.

The planning of measures to meet legal requirements and achieve ISO 14001 compliance is undertaken via Target 100 Environmental's [Action Planning](#) facility. A comprehensive range of [Checklists](#) and [Risk Assessments](#) are available to ensure the implementation and operation of these plans. Target 100 Environmental also provides a comprehensive suite of [Management Reports](#) and task reminders for use by internal and external stakeholder, together with ensuring consistent and thorough [Incident Management](#) should things go wrong.
